

Sathvik Sreeram

AI AUTOMATION · TOOL DEVELOPMENT · DIGITAL SYSTEMS · CS / AI-ML (BITS PILANI DUBAI)

sbsathvik@gmail.com · +971-58-5464749 · Dubai, UAE

PROFILE

Results-driven Computer Science Engineering student with hands-on experience in cybersecurity, creative design, and AI/ML. Proven leader across multiple university bodies — from Media Head to President of the campus Media House — with a track record of delivering high-impact events, visual campaigns, and digital communications. Currently interning at MSD (Merck & Co., Inc.) as a Creative Designer, translating business requirements into compelling digital assets. Passionate about the intersection of technology, design, and storytelling.

EXPERIENCE

Creative Design Intern & AI Automation Intern — MSD (Merck & Co., Inc.) Dubai · Present

Pharmaceutical multinational — Gulf marketing & digital communications team

- Designed and shipped a **production AI automation tool** that converts raw agenda files (.docx, .xlsx, .csv, .txt) into fully branded, deployment-ready HTML emailers — used live by marketing teams across UAE, Oman, Kuwait, Qatar, and Bahrain
- Built a **client-side file parsing pipeline** using SheetJS (Excel) and Mammoth.js (Word) with intelligent time-range detection, speaker extraction, and row normalisation — handling messy real-world inputs with no manual cleanup required
- Engineered a **real-time live preview system** with full typography and colour theming controls, logo trimming via pixel-level canvas manipulation, and banner overlay compositing
- Integrated **Salesforce Marketing Cloud** unsubscribe logic with per-country token injection (UAE, Oman, Kuwait, Qatar, Bahrain) and automated multi-file download splitting per region
- Delivered campaigns across emailers, flyers, decks, and social graphics — maintaining brand compliance across all MSD Gulf communications

Cybersecurity Intern — Mashreq Bank Dubai · Jun–Aug 2024

One of the UAE's largest banks — security operations & infrastructure

- Conducted vulnerability assessments across banking infrastructure; documented findings with remediation recommendations under NIST CSF 2.0 framework
- Contributed to automated security monitoring tooling used by the security operations team

PROJECTS

AI-Powered Emailer & Agenda Automation Platform — MSD Internal Tool 2025 · Live

- | HTML/CSS/JS | SheetJS | Mammoth.js | Canvas API | Salesforce MCloud | Regex NLP | CSS Custom Properties |
|-------------|---------|------------|------------|-------------------|-----------|-----------------------|
|-------------|---------|------------|------------|-------------------|-----------|-----------------------|
- Problem:** Marketing teams manually reformatting agendas and rebuilding email templates for every event across 5 Gulf markets — hours of repetitive work per campaign
 - Solution:** Full automation tool — user uploads a raw file in any format; the system parses it, detects time ranges and speaker blocks, and generates a live-previewed, pixel-perfect branded emailer ready for Salesforce deployment
 - Key engineering:** Client-side Excel parsing with merged cell resolution; Word DOCX table extraction with multi-column row distribution; real-time CSS custom property theming; pixel-level logo background trimming via Canvas API; per-country SFMC unsubscribe token injection and automated file splitting
 - Outcome:** Tool is in active use by the MSD Gulf marketing team — campaign emailer production time reduced from hours to minutes

Chess Game Outcome Prediction — ML Research Project 2024

- | Python | scikit-learn | pandas | Feature Engineering | Statistical Modelling |
|--------|--------------|--------|---------------------|-----------------------|
|--------|--------------|--------|---------------------|-----------------------|
- Built an ML pipeline to predict game outcomes from move sequences and player behavioural data
 - Handled full lifecycle: raw data ingestion, feature extraction from game notation, model selection, evaluation, and visualisation

TECHNICAL SKILLS

Automation & Build	Client-side file parsing (Excel, Word, CSV, plain text); real-time UI rendering pipelines; canvas image processing; pattern-matching NLP for document extraction; multi-output download automation
AI / LLM	OpenAI API; prompt engineering; LangChain (agentic workflows, chains, memory); AI agentic design patterns; local LLM deployment (Ollama); LLM fine-tuning concepts; RAG pipeline architecture
Cloud & Security	Microsoft Azure (AI Foundry, Machine Learning, Cloud Computing); Microsoft Security (GRC, Cloud Security, AI-powered protection); NIST CSF 1.0 & 2.0; vulnerability assessment; threat & vulnerability management
Languages & Frameworks	Python · JavaScript · HTML/CSS · Java · C · MATLAB · MIPS Assembly
Data & ML	scikit-learn · pandas · NumPy · data preprocessing · feature engineering · model evaluation
Dev Tools	Git · VS Code · Jupyter Notebooks · Linux/Unix · Docker
Design & Creative	Salesforce Marketing Cloud · Adobe Premiere Pro · Lightroom · event photography · emailer & campaign design

LEADERSHIP

Role	Organisation	Year
President	Reflexions — Official Media House, BITS Pilani Dubai	2025–26
Media Head	BITS Sports Festival	2025
Media Head	Jashn — Annual Cultural Festival (2,000+ attendees)	2026
Digital & Creative Co-Head	Jashn — Annual Cultural Festival	2025
Media Head	Microsoft Tech Club, BITS Pilani Dubai	2025–26
Marketing Head	Microsoft Tech Club, BITS Pilani Dubai	2024–25

EDUCATION

B.E. Computer Science — BITS Pilani Dubai Campus Specialization: Artificial Intelligence & Machine Learning	2021–Present
Higher Secondary (Science) — Narayana Junior College Physics, Chemistry, Mathematics · 97% in Grades 11 & 12	2019–2021
